

## 13<sup>th</sup> International Workshop on Meson Production, Properties and Interaction

**KRAKÓW, POLAND**

**29 May - 3 June 2014**

### CALL FOR REGISTRATION AND ABSTRACTS

Dear Colleague,

as a member of the worldwide Nuclear and Particle Physics community you are cordially invited to register for and eventually submit abstract to the MESON2014 Conference, which will be held in Cracow, Poland, in the period May 29 - June 3, 2014.

MESON2014 will be held in Auditorium Maximum of the Jagiellonian University - a conference site located in the very center of the marvelous city of Krakow, just a few minutes walking distance from the famous Market Square and only slightly farther from the Wawel Castle.

The forthcoming Workshop is the thirteenth in the series of biennial meetings, organized to provide an overview of the present status over a broad range of topics connected to meson physics. Traditionally, the morning sessions will be devoted to plenary general talks, while the more specific topics will be covered during parallel sessions in the afternoons, among which a session on physics on future facilities is planned. Several slots in the plenary sessions have been reserved to promote most interesting contributed talks - overview talks will be preferred here. We will organize also a poster session as an opportunity for students and young scientists to present the results of their work.

This year we will initiate a series of popular lectures within MESON conferences, on topics somewhat aside from meson physics, given by renowned scientists. Our first guest in this series will be professor Samuel C.C. Ting, MIT, who will present the Alpha Magnetic Spectrometer project.

We encourage you also to enjoy Cracow and its surroundings in the free time. Beside the scheduled social events (reception, conference dinner and excursion to the salt mine in Wieliczka, where you can choose between classic and newly opened miners' routes) there are many other possibilities which are worth exploring.

Please find further, constantly updated details about the program, registration procedure, accommodation, submission of abstracts, social events, proceedings, previous meetings etc. on the MESON2014 web page.

The MESON2014 Conference is organized jointly by:

- Institute of Physics, Jagiellonian University, Cracow, Poland
  - Institut für Kernphysik, Forschungszentrum Jülich, Germany
  - Istituto Nazionale di Fisica Nucleare - Laboratori Nazionali di Frascati, Italy
  - Institute of Nuclear Physics, Polish Academy of Sciences, Cracow, Poland
- and sponsored also from the funds of the *HadronPhysics3* project.

**Looking forward to seeing you in Kraków,**

Carlo Guaraldo  
Andrzej Magiera  
Hans Ströher  
Aleksandra Wrońska

## KEY DATES

23 March, 2014	Deadline for abstract submission
20 April, 2014	Notification of acceptance
27 April, 2014	Deadline for registration and reduced fee payment
31 May, 2014	Conference start
