

**14th International Workshop on Meson Production,
Properties and Interaction
KRAKÓW, POLAND
2 - 7 June 2016**

CALL FOR REGISTRATION AND ABSTRACTS

Dear Colleague,

as a member of the worldwide Nuclear and Particle Physics community you are cordially invited to register for and eventually submit abstract to the MESON2016 Conference, which will be held in Kraków, Poland, in the period 2-7 June 2016.

MESON2016 will be held in Auditorium Maximum of the Jagiellonian University - a conference site located in the very center of the marvelous city of Krakow, just a few minutes walking distance from the famous Market Square and only slightly farther from the Wawel Castle.

The forthcoming workshop is the fourteenth in the series launched in 1991, organized to provide an overview of the present status over a broad range of topics connected to meson physics. Traditionally, the morning sessions will be devoted to plenary general talks, while the more specific topics will be covered during parallel sessions in the afternoons. With the invaluable help of the MESON2016 International Advisory Committee (for the list of its renowned members we refer you to the conference web page), we have constructed an exciting invited program, containing highlights from all the main players in the field of meson physics as well as foretastes of future projects. The list of confirmed invited speakers is already available on-line. Several slots in the plenary sessions have been reserved to promote most interesting contributed talks. We will organize also a poster session as an opportunity for students and young scientists to present the results of their work.

On Saturday afternoon we will have a pleasure to offer a special semi-popular lecture by professor Eugenio Coccia from the University of Rome "Tor Vergata" and Gran Sasso Science Institute, INFN, who will speak about the quest for gravitational waves.

We encourage you also to enjoy Kraków and its surroundings in the free time. Beside the scheduled social events (reception, conference dinner and excursion to the Tatra mountains, where you can choose between two routes of different difficulty level) there are many other possibilities which are worth exploring.

Please find further, constantly updated details about the program, registration procedure, possibilities of obtaining financial support, accommodation, submission of abstracts, social events, proceedings, previous meetings etc. on the MESON2016 web page.

The MESON2016 Conference is organized jointly by:

- Institute of Physics, Jagiellonian University, Kraków, Poland
- Institut für Kernphysik, Forschungszentrum Jülich, Germany
- Istituto Nazionale di Fisica Nucleare - Laboratori Nazionali di Frascati, Italy
- Institute of Nuclear Physics, Polish Academy of Sciences, Kraków, Poland.

Looking forward to seeing you in Kraków,

Carlo Guaraldo
Andrzej Magiera
Hans Ströher
Aleksandra Wrońska
/for the Organizing Committee/

KEY DATES

25 March 2016	Deadline for abstract submission
25 March 2016	Deadline for applications for support
22 April 2016	Notification of acceptance
1 May 2016	Deadline for registration and reduced fee payment
2 June 2016	Conference start
